ABOUT ME

An inspired MERN stack developer, always curious about new problems and learning new things in order to deliver out of the box solutions with complete ownership. Hands on experience in solving close to 500 DSA problems and developing five MERN based projects

OPEN SOURCE CONTRIBUTION

TensorFlow

- TensorFlow is an end-to-end open source platform for machine learning. It has a comprehensive, flexible ecosystem of tools, libraries, and community resources that lets researchers push the state-of-the-art in ML and developers easily build and deploy ML-powered applications.

Layer5io

- Layer5's cloud native application and infrastructure management software enables organizations to expect more from their infrastructure. We embrace developer-defined infrastructure.
